

TITAN VS PROTEUS

PERGOLA DIFFERENCES EXPLAINED

The below comparison guide provides comprehensive differences between both Titan and Proteus ranges. All of our Pergolas are fully weatherproof and available in a range of sizes and colours, allowing outdoor enjoyment no matter the weather!

		TITAN	PROTEUS
1	Privacy Screens Available	Yes*	No
2	Roof Louvre Material	Double skinned Aluminium	Galvanised Steel
3	Frame Material	Aluminium	Aluminium
4	Frame Overall Height	251cm	251cm (4mx3m) / 241cm (3mx3m)
5	Frame Leg Thickness	111 x 111mm	111 x 111mm (4mx3m) / 88 x 88mm (3mx3m)
6	Powder Coated	Tiger DRYLAC®	Non branded
7	Guarantee	5 Years	2 Years

**Not suitable for the Titan wall mounted collection*

TITAN

PERGOLA COLLECTION

Our Titan Pergola collection offers ultimate luxury, manufactured using the best materials and offering unparalleled durability and build quality.

Made from high quality aluminium, the Titan range provides all year round, weather resistant protection. Each Pergola is UV protected and therefore resistant to fading and other damage typically caused by heat. The super durable Tiger DRYLAC® powder coating prevents corrosion, offering ultimate Pergola protection and lifespan.

All Titan Pergolas offer the perfect opportunity to extend outdoor living, thanks mainly to the aluminium tilting louvres. Switching between a closed, sheltered space and an open top is easy. The smooth, rotating crank mechanism means that the transition between an open and closed roof takes a matter of seconds. When the aluminium louvres are closed the roof is waterproof, allowing the use of any outdoor area even when the weather is less than perfect!

Integrated within the Titan collection is an effective drainage system allowing water to flow from the louvre roof panels and into the inside of the legs. This superb drainage method prevents a pool of water on top of all closed Pergolas.

This sophisticated drainage solution has earned the Titan Pergola Collection a prestigious Red Dot Award.

"Equipped with an innovative rainwater drainage system, the Pergola is compelling as both functionality sophisticated and robust."

Statement by the Red Dot Award Jury.

RECTANGULAR & SQUARE

PRODUCT FEATURES

- Easy to follow instructions (min. 2 person installation)
- Available in various sizes
- Universal ground fixing bolts
- 100% waterproof louvred roof
- Double skinned tilting louvres with crank mechanism
- Rust and UV resistant aluminium frame and roof
- Frame leg thickness of 111mm
- Fully integrated drainage system
- Tiger DRYLAC® powder coated finish
- Achieved a Red Dot Award for design and innovation

PRODUCT BENEFITS

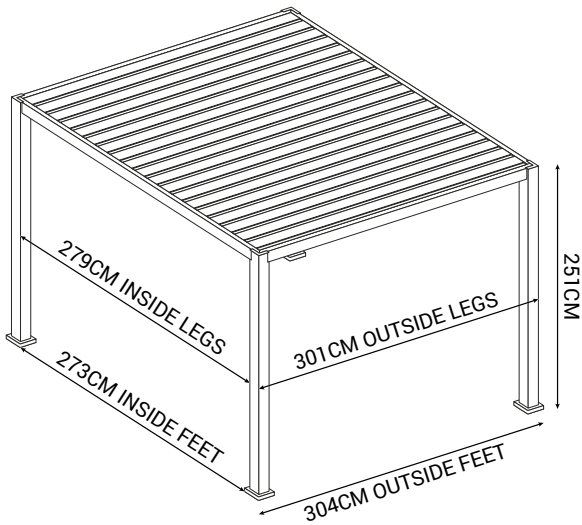

- Ultimate stability from the premium tubular framework
- Open and close the roof in a matter of seconds
- Ultimate durability with minimal maintenance required
- Long lasting, all weather use
- Stay dry and protected whatever the weather
- Wind tested to successfully withstand a violent storm
- Fully threaded legs allow for cutting to reduce overall Pergola height (separate foot plates)

CODE	COLOUR	PERGOLA SIZE	LEGS

SCREENS

Our privacy screens are the perfect addition to the Titan Pergola range, in order to make your outdoor space even more protected against the elements.

The screens can be attached to any Titan Pergola via its aluminium framework and are manually pulled down in order to create the protection you need. When you wish to open your Pergola, simply push the screen up and back into the aluminium roller. The screen is made from heavy duty texteline material, offering a fully weather-resistant solution that can be left outdoors all year round with minimal maintenance.

All prices are for individual items, but to offer ultimate protection we would recommend purchasing multiple screens.

*Please note: These privacy screens are **not suitable** for wall mounted Pergolas or the Proteus 3m square Pergola. Privacy screens cannot be attached to side where the crank mechanism is located.*

The installation of all privacy screens involves drilling directly into the Pergola framework.

PROTEUS

PERGOLA COLLECTION

The Proteus Pergola collection is perfect for adding a contemporary, covered solution to any outdoor space.

Made from aluminium framework and galvanised steel louvres, the Proteus range provides all year round, weather resistant protection. Each Pergola is UV protected and therefore resistant to fading and other damage typically caused by heat.

All Proteus Pergolas offer the perfect opportunity to extend outdoor living, thanks mainly to the galvanised steel tilting louvres. Switching between a closed, sheltered space and an open top, allowing direct sunlight in is easy.

The smooth, rotating crank mechanism means that the transition between an open and closed roof takes a matter of seconds. When the louvres are closed the roof is fully watertight and waterproof, allowing the use of any outdoor area even when the weather is less than perfect!

Integrated within the Proteus collection is an effective built-in drainage system allowing water to flow from the louvre roof panels and into the inside of the legs. This superb drainage method prevents a pool of water on top of all closed Pergolas.
